## About the Department

Environmental Science is a multi-disciplinary endeavour incorporating natural and social sciences in the study of man's relationship with air, water, and soil and with fellow humans and other forms of life. With the purpose of learning and providing solutions, Bishop Heber College started the Post Graduate Department of Environmental Sciences in the year 1984. Situated in an aesthetically landscaped campus with architecturally designed buildings, the Post Graduate Department of Environmental Sciences was started with a mission to ensure Environmental Sustainability. This unique pioneer program in South India is an interdisciplinary course involving the disciplines of various streams. Sensing the essentials of research, it was upgraded to a research department in 1990. To gratify the demands from industrial sectors, add on courses including PG Diploma in Industrial Safety, PG Diploma in Industrial Safety & Occupational Health and Certificate Programme in Industrial Safety & Hygiene were introduced in parallel with the main courses. The department has started to offer graduation in Environmental Sciences since 2017 so as to compete in various fields for the post graduates by inclusion of current needs and specializations.

## About the Conference

Healthy Planet is not an option; But it is a necessity. We have one planet to live on. It is our responsibility to keep it safe and sustainable. The Sustainable Development Goals were adopted by around 170 UN Member countries in 2015 in order to ensure peace and prosperity. The integrated goals recognize that action in one area will affect outcomes in others, and that development must balance social, economic and environmental sustainability. In creating awareness and foreseeing the achievements of SDGs 2030, and in view of the World Earth Day commemoration, the PG and Research Department of Environmental Sciences Department is about to organise this virtual conference. The important sub-themes are enlisted in the following section. A Video contest is also to be conducted with the theme of EARTH SCAN 2021. The details of the contest is given next page. A Life-time achievement award is being called for with the aim to honour those contribute in the field of Environmental service. Selective full papers will be published in a post-conference proceedings with ISBN.
