Knowledge Partner: NSE Academy

Financial Technology

FinTech is the future of BFSI

As the sector is technologically transforming, the demand for young talent with exposure to finance and expertise in technology is rapidly increasing, especially in areas of banking, neo-banking, equity research, advisory, risk management, etc.

B.Com Financial Technology

A highly specialized graduation program to empower students with futuristic skills and competencies for the technologically transforming finance sector and rapidly evolving fintech sector.

Students develop an overview of financial markets, a comprehensive understanding of emerging financial technologies, and capabilities to apply the concepts in real-world situations

The financial markets in India are poised to grow steadily, fueled by growing demand, policy support, innovation, and digitization, making it one of the most desired career destinations among young talent.

Career Potential

A quick search on job portals like naukri, glassdoor, indeed, monster, etc. would reveal **thousands of openings in financial markets with attractive pay scales**
